Key skills

- Python (pandas, scikit-learn)
- SQL
- Excel
- Java
- HTML, CSS, JavaScript
- Flask, Streamlit, Next.js
- Git & GitHub
- Communication
- Adaptability
- Time Management

Education

National University Laguna / Undergraduate
2023- Present, Calamba, Laguna

- 4th year student
- Bachelor of Science in Computer Science

La Consolacion College Tanauan / Highschool
2017-2022 Tanauan, Batangas

- STEM

Summary

4th-year Computer Science student focused on software development and data analysis, currently working remotely as a Distributor Specialist VA for a US-based wholesaler. I want to use code and data to help businesses work smarter. Seeking an internship or entry-level role in software development or data analysis.

Projects

Fitness Chatbot (machine learning, NLP)
Python · Flask · scikit-learn · github.com/angelkgithub/Fitness_Chatbot

- Built a chatbot web app that classifies messages into 15 intents using TF-IDF and logistic regression, with a dashboard for precision, recall, F1 and a confusion matrix.
- Reached 72.6% cross-validated accuracy; added a confidence threshold so the bot asks a clarifying question instead of guessing.

Curriculum Scheduler (Algorithms finals project)
Python · Streamlit · pandas · github.com/angelkgithub/AlgoFinal

- Built a Streamlit app that generates class timetables for 180+ courses from course, room and enrollment data.
- Implemented greedy, backtracking and constraint-satisfaction scheduling with room and section conflict detection, plus CSV export.

Employee Team Hub (internal company website)
HTML · CSS · JavaScript · Vercel · github.com/angelkgithub/EMS-EMPLOYEE

- Built a website for a medical supply company that gives employees one place for tool links, training videos, call recordings, the org chart and house rules.
- Added site-wide search, dark mode, a pre-deploy link checker, security headers and an optional password gate.

CAFRM and Fine-tuned ADCD-Net (undergraduate thesis, team of 3, 2026)
Python · PyTorch · PyMuPDF

- Co-authored a thesis on detecting tampered regions in document images after they've been saved to PDF and converted back, using a compression-aware refinement network (CAFRM) with a fine-tuned ADCD-Net detector.
- Researched related studies on document forgery detection, compression artifacts and image restoration to shape the study's direction and literature review.

Career history

Distributor Specialist Virtual Assistant at US-based Wholesaler (Remote)

[August 2026] – Present

- Support a US wholesaler's distributor operations remotely.
- Built and maintained relationships with 5–9 customer accounts, reaching out proactively when they needed to restock supplies.
- Built an internal Employee Team Hub for quick access to daily tools, and an org chart requested by the director.

Part time Customer Support & Product Sourcing Assistant at (Client Base)

February 2025 – May 2025

- Support clients in their e-commerce operations by handling customer inquiries and sourcing products based on specific needs.

Key responsibilities

- Communicate with customers to assist with orders and questions.
- Coordinate updates between clients, customers, and suppliers.

Achievements

- Sourced 100+ products efficiently with a high satisfaction rate.
- Maintained excellent customer feedback with timely responses.
